SUMMARY OF GOVERNOR HODGES' INAUGURAL ADDRESS

Delivered to joint session of the General Assembly
of North Carolina at 12:30 p.m., February 7, 1957

Governor Hodges expressed his appreciation to the people of the state who had supported and expressed their confidence in him, to the members of General Assemblies with which he had worked for a cooperative and constructive approach to the problems of State government and the assistance they have given him, to the State employees for their cooperation and assistance, and to his associates, office staff, and family. He paid tribute to the late Governor William B. Umstead and to his other predecessors in office for the past half century for their outstanding and dedicated service to the state.

Governor Hodges noted that the inaugural address of a Governor has traditionally been the time when he outlined in some detail his legislative program for the state, and that he respected this tradition. He desired,however, to take a somewhat different approach by taking a broad look at North Carolina in his inaugural address and presenting his legislative program in the form of a Biennial Message to a Joint Session of the General Assembly on Monday night, subject to the approval of the General Assembly.

Governor Hodges then traced the history of North Carolina from 1524 to the present date with respect to its government, its people, and its heritage, and expressed confidence that North Carolina would meet its problems with courage and foresight.

SUMMARY OF GOVERNOR HODGES' BIENNIAL MESSAGE

Delivered to joint session of the General Assembly of
North Carolina at 8:30 p.m., February 11, 1957

Governor Hodges noted that he had refrained from discussing in his inaugural address the specific proposals which he believed should be adopted for the coming biennium. He said he also intended to make another change in tradition by not giving a comprehensive discussion of the recommended budget appropriations.

THE BUDGET

(1) General Observations

Unanticipated revenues ($47 1/2 million) and savings from appropriations are expected to give the General Fund at the end of the fiscal year a credit balance of $59,871,113. This and optimistic revenue predictions will enable the State to maintain the level of essential services, to raise the salaries of teachers and other State employees, to undertake an adequate capital improvements program, and to revise our revenue structure as recommended by the Tax Study Commission. Total recommended appropriations (apart from capital improvements) amount to $500,678,543, or 20% more than those for the present biennium. Recommended capital improvement appropriations amount to $42,541,474. "It is my sincere conviction that by proportioning the available funds in amounts which allow us to accomplish all these things, rather than having to leave some undone because of devoting a larger amount to any particular program, our State will move forward toward an expanding and balanced economy while maintaining government services at the level expected by its people."

(2) Revision of Revenue Act

Statistics on population and per capita income, particularly those relating to farmers, indicate "a disturbing picture of the economic situation in North Carolina as of today." In order to provide jobs that our people must have, "I can see only one answer. We must develop more industry, both manufacturing and agricultural. We must create more industry locally financed, and we must bring in more industry from outside. We must encourage in every reasonable way the expansion of industry which is already here."

The 1955 General Assembly recognized, by the creation of the Commission to Study the Revenue Structure of the State (Tax Study Commission), that a roadblock to industrial development might be found in our tax structure. This Commission, despite widely varying economic viewpoints of its members, has brought in a unanimous report which confirms the misgivings of the 1955 General Assembly.

I have been highly gratified with the general response to the Commission's tax proposals, even among groups which would have some slight tax increases. The proposals are not a "give-away" program for industry in any sense, but merely remove some unfair aspects of our system of taxation on industry in order to bring us into line with the approach used by the great majority of the states.

Citizens of small and moderate incomes will be benefited by proposals (a) permitting sale of one's home and purchase of another without considering profits on the sale as income and (b) authorizing "standard deductions" on income taxes. They will also benefit through economic growth of the State. Only through raising the low and moderate incomes can we make any really important improvement in the State's per capita income figures.

There seems to be considerable concern over proposals authorizing additional revenue-raising powers for local governments. Population growth in and around our cities means that revenues to provide essential local services must be provided, and failure to move now may result in demands for more drastic action later.

The proposed revisions of our revenue laws were formulated together, each in the light of the others, and there has been no effort to show favoritism to any group. I hope that you will consider them in that light.

OTHER RECOMMENDATIONS

(1) Agriculture

While seeking to improve the economy of the State through industrialization, we must place equal emphasis on improvement in the agricultural segment of our economy. I urge you to discuss this matter with representatives of our state agencies concerned with agriculture--notably the N.C. State College School of Agriculture, the Department of Agriculture, and the Department of Conservation and Development.

(2) Public Education

The State should continue to provide a good minimum support for our schools in every county. We are recommending the expenditure of $286 million for this purpose in the coming biennium, as compared with $247 million for the present biennium. In addition, we should raise the salaries of teachers along with those of other state employees.

School leaders and teachers should constantly reappraise their jobs and the system under which they work, so as to answer questions which our citizens are asking. I have recently appointed a statewide Citizens Committee for Better Schools to help stimulate interest throughout the state in public school education, which I believe will prove beneficial.

We need more vocational and technical education, particularly on the industrial side. I am glad that the State Board of Education is working on this at the public school level and the Board of Higher Education is recommending the establishment of technical institutes and the strengthening of the one now in existence.

The Board of Higher Education is also recommending, with our approval, the creation of a loan fund for college students who want to go into public school teaching.

If federal funds are made available for school construction while the General Assembly is in session, we will make appropriate recommendations. If congressional action comes after adjournment, a special session may be called to deal with this problem.

(3) Higher Education

The Board of Higher Education is beginning to provide much-needed coordinatio among the State's institutions of higher learning, and its review of institutional budgets has been of great help to the Advisory Budget Commission.

We are recommending salary increases for college personnel and appropriations for several new buildings. Several buildings are to be financed out of a new revolvin fund.

The Board of Higher Education is making some preliminary evaluations of closed circuit television for instructional purposes, and we recommend that a contingent appropriation be authorized from the Contingency and Emergency Fund to finance an experimental installation. This could effect great savings to the State in time.

We also believe there are great possibilities in the future development of community colleges, and recommend (in accordance with Board of Higher Education suggestions) that the State bear approximately 1/3 of the college grade instructional costs and 1/2 of certain capital improvements costs of the colleges in Charlotte, Asheville, and Wilmington.

(4) Highways and Highway Administration

You will recall that in 1955 we did not accept the recommendation for a highway bond issue and kept highway expenditures on a pay-as-we-go basis, pending the adoption of the federal highway program. The combination of state highway revenues in excess of estimates and the availability of large sums of federal funds means that for the time being the State could not intelligently spend more money for highways than is available. The total budget of the Highway Commission for the coming biennium is $380,961,467 (of which $136,149,992 is federal money).

There is a desperate shortage of trained personnel. To meet this shortage, we propose a training program for personnel of the Highway Department underneath the professional engineers and greater use of modern accounting and electronic equipment to save engineering talent.

I support enthusiastically the report of the Study Commission which has been examining Highway Commission organization for the past two years. Its recommendations would subject the Highway Department to the same budgetary controls as other agencies of the State government. The Department's accounting structure would be modernized; the Highway Commission would become a policy-making body like other boards of State government; the Director would be a career man; the building of roads would be on a statewide basis; County Commissioners would be consulted on the building of local roads; and a top official of the Department would be assigned full-time duty with rural roads.

(5) Prison Separation

In accordance with recommendations of the Commission on Reorganization of State Government, a special committee was created by the 1955 General Assembly to study the feasibility of separating the prison system from the State Highway Commission. This committee has found such separation feasible. I do not believe that such separation will place too much burden on the General Fund. I strongly recommend that you adopt measures to accomplish separation.

(6) Administration of Justice

The Youth Service Commission has submitted a report recommending the creation of a state-supported system of domestic relations courts. This may well be a long-range need of North Carolina.

Recommendations will be placed before the General Assembly dealing with excessive and uneven workloads and problems of conflicting interests facing our "part-time" superior court solicitors.

No other substantial changes are proposed in our court system at this time. A comprehensive study is now being made by a distinguished committee of the North Carolina Bar Association, looking toward presentation of recommendations to the 1959 General Assembly.

(7) Highway Safety

I hope you will deem it advisable to provide our Department of Motor Vehicles with the safety program being recommended by the Commissioner. I also commend to you proposals which will be submitted with respect to driver education.

(8) Reorganization of State Government

North Carolina seems to have adopted a policy of gradual and continual reorganization of State government, as begun by the Reorganization Commission of 1953-55 and its sucessor Commission of 1955-57. In my opinion this is a sound approach which results in better considered and more workable proposals. I hope that you will authorize for the next biennium another Commission to continue this approach.

I believe the recommendations contained in the ten reports submitted by the current Commission will impress you. I particularly urge the creation of the proposed Department of Administration as a great aid to future Governors, as well as to me.

In addition I recommend the creation (1) of a Capitol Building Commission to consider the construction of a capitol office and legislative building to supplement our present cramped facilities and (2) of a Commission to submit recommendations for modernization of our State Constitution to the next General Assembly.

I think you will like the plan for legislative reapportionment submitted by a Study Commission. If not, you still have the responsibility for reapportionment in accordance with constitutional requirements.

(9) Natural Resources

We must plan wisely and work cooperatively on our water problems, for our State's future development in agriculture and industry will be affected by our handling of this resource.

(10) Hurricane Rehabilitation

We must plan and work to preserve our shore lines, our coastal farms, our beaches, our inland streams, and other resources from hurricane damage. Short range work includes stabilization of beaches through construction and replanting, clearing of livestock off our shore land, rehabilitation of damaged farm land, and mosquito control. In addition, enormously expensive long range measures must be undertaken.

To plan these measures on a full-time basis and to work with federal agencies, I recommend the creation of a Planning Division in the Department of Conservation and Development. This will also permit cities and towns to receive certain federal funds available for planning assistance.

(11) Minimum Wage

As part of our program to raise per capita income, we should have a minimum wage.

(12) Welfare, Health, and Hospitals

Although our welfare program has on the whole been constructive, welfare officials are prevented by gaps in basic legislation from developing properly certain policies needed to improve administration. I urge careful consideration of measures to fill these gaps, particularly methods to control welfare payments to mothers of illegitimate children.

The State Board of Health will seek your approval of a much-needed re-write of all public health laws in the State.

The State's hospital program is progressing nicely. I urge that you continue to give this program the budgetary support it needs, including provisions for mental training schools at Goldsboro and Butner.

(13) Absentee Ballot and Liquor

I repeat the recommendations of my 1955 Biennial Message that civilian absentee ballot provisions for the General Elections be abolished and that the liquor question be submitted to a vote of the people.

(14) Segregation

We have been fortunate in avoiding the lawlessness and violence which have taken place in other states in the wake of the segregation decisions of the United States Supreme Court, and I would like to commend all of our citizens for their calmness and wisdom.

The Advisory Committee on Education has under consideration the question of whether to recommend further changes in the school laws, but the decision on this will await disposition of several legal actions now pending. In the meantime, I recommend the strengthening of registration laws applicable to various pressure and propaganda groups.

State Personnel Dept. and other salary setting authorities, subject to direction and approval of Director of Budget, must establish practicable and equitable base rates of pay for all positions in State government for which they possess authority, effective July 1, 1957; but no employee's salary may be increased by an amount which causes it to exceed maximum established rate of pay after adjustments on July 1, 1957, nor may any increase be granted to employee whose salary is at or in excess of established rate of pay after adjustments on July 1, 1957. State Board of Education must establish base rates of pay and salaries of public school employees effective July 1, 1957, and within present number of increment years on salary schedules; and salary increase for public school employees must take into consideration encouragement and rewarding of individual initiative, effort, efficiency, and effectiveness of public school employees. Funds appropriated for salary increases must be transferred by Director of Budget to agencies to conform with above requirements as to salary increases. Above provisions governing salary increases may be applied to adjust salaries paid out of special funds or from sources other than tax revenues provided necessary funds are made available from operations or from sponsoring agents. Director of Budget may allocate out of special operating funds under which personnel is employed sufficient sums to conform with above provisions governing salary increases, provided funds are available or are made available by sponsoring agents.

"To amend and supplement 'The Revenue Act,' being Subchapter I of Chapter 105 of the General Statutes." [Effective July 1, 1957, unless otherwise indicated amends provisions of existing tax schedules of GS Ch. 105 as follows:

Inheritance Tax, Article 1, Schedule A: Amends (1) GS 105-4 to deny exemption of $5,000 to each child under 21 when widow who receives all or substantially all of estate elects to take $5,000 exemption for each such child; (2) GS 105-7 to permit deductions of federal estate taxes assessed under Internal Revenue Code of 1954 rather than under Federal Revenue Act of 1926; (3) GS 105-9(e) to prevent deduction of federal estate taxes; (4) GS 105-20 to provide that liens against land for inheritance and estate taxes be limited to 10 years immediately following death of decedent; and rewrites GS 105-14 to permit beneficiary of estate under GS 105-4 or 105-5 to claim tax credit for taxes paid on previous transfer of property within 2 years prior to death of decedent, with total credit to be pro-rated among beneficiaries in same proportion as taxable value of property received by each bears to total taxable value of corpus of estate upon the later transfer.

License Tax, Article 2: Rewrites Art. 2 to levy State occupation tax under Art. 2 and county and municipal occupation tax under new Art. 2A. Major change is shift to levy based on 'gross receipts' rather than present flat rates. Overlapping taxing authority of State and local govermental units is modified so that no business is taxed by more than one unit. Taxes levied under both articles are on annual basis, and licenses issued thereunder are not transferrable. Other provisions remain substantially unchanged, except as noted below.

Article 2, State Occupation Tax. Article as rewritten defines 'gross receipts' and sets forth procedures for paying tax and penalties for failure to pay. State 'gross receipts' levy includes:

Soft drink bottlers	0.4 of 1%
Newspapers	0.1 of 1%
Ice cream manufacturers	0.1 of 1%
Wholesale trades	0.075 of 1%
Selected retail trades	0.09 of 1%
Selected contractors	0.1 of 1% (includes State license fee of $10)
Radio stations	0.1 of 1%
Dry cleaners	0.3 of 1%
Laundries	0.3 of 1%

Advertising services	0.3 of 1%
Other service activities	0.3 of 1%
Drive-in theaters	0.6 of 1%

In addition to 'gross receipts' levy listed above, State occupation tax on all professions is fixed at $50.

Art. 2A, Municipal and county occupation taxes. New Art. 2A defines "gross receipts" and sets forth procedures for paying tax and penalties for failure to pay tax. Maximum occupational tax authorized municipalities and counties include:

	City	County
Selected retail trades	0.09 of 1%	0.45 of 1%
Eating establishments	0.15 of 1%	0.075 of 1%
Selected Service activities	0.3 of 1%	0.6 of 1%
Selected contractors and construction trades	0.1 of 1%	0.1 of 1%
Manufacturing	0.1 of 1%(max.$2,500)	0.05 of 1% (max. $1,250)

New provisions authorize municipalities to levy tax not exceeding $10 on (a) each auto resident in municipality and (b) each person earning living within municipality.

Franchise Tax, Article 3, Schedule C: Amends GS 105-119 to delete provision that gross receipts tax upon telegraph companies shall not be levied upon interstate commerce. Amends GS 105-122 to apply methods of determining net apportionable income contained in proposed income tax revisions (see below) to determination of the allocation of capital stock, surplus, and undivided profits of corporations filing franchise or privilege tax under this section. Amends GS 105-124 to authorize Revenue Commissioner to make deficiency assessment within three years after return is filed if filing is late.

Income Tax, Article 4: Significant changes include:

Corporations. Rewrites GS 105-134 (retaining present 6% corporation income tax rate on income derived from in-state business) to levy corporation tax only upon income reasonably attributable to operations in state. Income from intangible property is allocated to state of business and income from tangible property to situs of property. Corporations engaged in manufacturing are required to use arithmetic average of ratios of porperty, payrolls, and sales in allocating income. Present property factor is retained with addition of provision that value of leased realty and personalty must be included in value of property, but property the income from which is excluded from net apportionable income is excluded from ratio. Payroll factor includes all wages, salaries, and other compensation paid in state (exclusive of executives' salaries). Sales factor is changed to attribute sales to destination of shipment when sales made in state.

Income from operation of railroads is allocated according to ratio of "operating revenue" within state to "total operating revenue" as shown by records kept in accordance with I.C.C. regulations. Corporations operating physically separated lines where one or more partially in state are to use actual earnings and expenses of such lines in state to determine net income taxable in state.

Telephone companies are required to use ratio of (1) gross operating revenue from local services plus gross revenue from in-state tolls plus proportion of interstate tolls as shown by company records plus gross revenue from other sources in state less uncollectible revenue to (2) total gross operating revenue from all business less total uncollectible revenue. Accounts kept in accordance with F.C.C. regulations may be used in determining apportionment ratio.

Property motor carriers are required to apportion income on ratio of vehicle miles in state to total vehicle miles everywhere (defined to exclude miles traveled empty). Passenger motor carriers are required to use arithmetic average of (1) ratio of vehicle miles in state to total vehicle miles and (2) ratio of gross operating revenue in state (defined as revenue from ticket sales plus revenue from goods shipped prepaid or received collect in state) to total gross operating revenue.

Corporations engaged in other businesses are required to use ratio of gross receipts (defined to include receipts from all sources, except gross receipts from business operations or for property the net income of which is excluded from apportionable net income are excluded) in state to total gross receipts.

Unincorporated businesses in state with operations in other states when owned by non-resident or by partnership with non-resident partner are required to allocate net income from business within state in same manner as corporations engaged in same type business.

Places public service corporations under same tax category as other corporations.

Exemptions. Amends (a) GS 105-138 (conditional and other exemptions) to include trusts as well as corporations created for cemetery, charitable, and educational purposes, and to specify that section not to be construed as exempting co-ops and mutual associations from income tax on net income not refunded (now not "allocated" to patrons on patronage basis; (b) GS 105-141 (1) to exclude from gross income of estate, wife, or heir of deceased employee payments made by employer upon death of deceased and GS 105-147 to permit employer to deduct such payments in reasonable amounts; (c) GS 105-141 (2) to exempt social security benefits, value of meals furnished employee, and amounts paid by employer on group insurance plans from definition of gross income of employee; (d) GS 105-147 to permit all taxpayers to take a standard deduction of 10% or $500 whichever is less (non-residents to deduct on pro rata basis) and to delete limit of $1,000 on amount of alimony payments deductible.

Capital gains. Adds GS 105-144.2, similar to provision of federal code, whereby no gain is recognized upon sale of home if substantially similar home is acquired within one year prior to or following such sale, except to extent that adjusted sale price of old residence exceeds cost of new one.

Determination of net income. Rewrites GS 105-147 (6) (c) to repeal provision which limits deduction of losses realized upon sale of securities held for less than one year (or from trading in commodities) to gains of like kind, and adds a 'wash' sale provision similar to one contained in federal code. Adds GS 105-144.3 to permit taxpayers to amortize premiums paid on taxable bonds on an elective basis and to require amortization of premiums paid on tax-exempt bonds. Amends GS 105-147 (6) (d) to permit taxpayer to carry forward 'net economic losses' for five years (now two) following year of loss.

Other. Amends GS 105-132 (2) definition of 'heads of households' to include households irrespective of whether in N.C., and amends GS 105-133 to make clear that income tax is to be imposed on resident fiduciary as defined in GS 105-139.

Except as otherwise provided in Act, revisions apply to income years beginning on and after Jan. 1, 1957.

Sales and Use Tax, Art. 5, Schedule E: Repeals Art. 8 of GS Ch. 105 (use tax) and rewrites Art. 5 of GS Ch. 105 to include both sales and use taxes. Adds to purpose of tax (formerly limited to support of schools) "other necessary uses and purposes" of the State. Repeals 1/20 of 1% tax on wholesale sales, but retains $10 annual license fee, and requires wholesalers to keep duplicate bills of sale on file for three years, under penalty of being taxed as at retail. Imposes 3% tax on retail sales or rentals of tangible personal property, specifically excluding stocks, bonds, insurance, and electricity, gas, and water when delivered through main lines or pipes. Taxes as sale the installation or affixing of personal property for a consideration by serviceman to property of customer. Rentals for period of more than 90 days and isolated sales are excluded from tax. Retains existing provision (1%, with maximum of $80) as to sales of airplanes and motor vehicles; farm tractors, road machinery, and vehicles designed primarily for off-highway use are exempt. Relieves Commissioner and Attorney General of any compulsion to follow existing administrative intrepretations, policies and practices (including those which, according to Tax Study Commissio now exempt sales of machinery and supplies to laundries and cleaners, asphalt, advertising materials purchased indirectly by credits in bottling companies' syrup accounts, bulk paper to firms operating printing presses, paint to service stations and garages, meals by boarding houses, sales to and by Indians on reservations, paint sold to manufacturers for painting machinery, wiping rags to manufacturers, equipment and supplies to freezer lockers and poultry processors and including those which now tax optical supplies sold to opticians and optometrists). Exempts first $150 of funeral expense; remainder taxable. Taxes following items now exempt by statute or administrative regulation: popcorn and peanutssold at theaters and concession stands, and food products and liquids dispensed through vending machines. Where used articles are taken in trade, tax is on difference between price of new article and credit allowed for trade-in; transportation costs are taxable if title to property passes at destination , not taxable if title passes at point of origin; sale price includes manufacturer's excise taxes, but not U. S. retail taxes. Codifies existing administrative practice which provides for bracket system of collection. Adds to statutory exemptions in present law certain items now exempt by administrative or judicial decision or practice (school lunches, meals in dining rooms of educational institutions serving students only; sales by blind merchants under Commission for Blind; meals served by eating places to employees as part of their compensation; sales to inmates and guards by concession stands operated by State Prison System within confines of prison; telephone equipment sold to telephone and telegraph companies regulated by N. C. Utilities Commission; eyeglasses ground on prescription; newsprint and newspapers; wrapping materials and containers sold to manufacturers, etc., to be used in packaging or delivering property sold at wholesale or retail, when such articles constitute a part of the property sold and delivered to customer; lease of films, transcriptions, etc. to radio or TV stations). Inserts separate jeopardy assessment procedure for sales tax. Authorizes Commissioner to make regulations for making returns, and for ascertainment, assessment and collection of tax.

Gift Tax, Art. 6, Schedule G: Amends GS 105-188 to make the annual exclusion from gift tax $3000 (present law: $1000), effective beginning with gifts reportable for 1957 calendar year.

Intangible Personal Property Tax, Art. 7, Schedule H: Amends GS 105-213 to require State to distribute total net revenue from intangibles tax, beginning with distributions due on or after July 1, 1957, to counties and municipalities (present law: State retains 20%). Amends GS 105-200, GS 105-201, and GS 105-202, to require taxpayers reporting on fiscal year basis for income tax purposes to report cash on hand, accounts receivable, and evidences of debt at end of fiscal year (rather than Dec. 31) for intangibles tax purposes. Amends GS 105-12 to exempt from intangibles tax trusts established for religious, educational, charitable, or benevolent purposes where no property or income of trust may inure to benefit of individual or organization conducted for profit.

Taxation of Banks, Art. 8C, Schedule 1C: Adds new Art. 8C to GS Ch.105, adopting method (4) of taxation of banks authorized by Congress in 12 U.S. Code § 548. Levies annual excise tax measured by 4 1/2% of net income on all banks (specifically including national banks) located and doing business in State; net income is to include interest from federal government obligations, but exclude income from obligations of State and its political subdividions (if this exclusion is held unconstitutional, income from State and local obligations will be taxable). Minimum tax $10. Tax is in lieu of and replaces (with respect to banks) intangible personal property tax under Art. 7, GS Ch.105; franchise tax under Art. 3, GS Ch.105; income tax under Art.4, GS Ch.105; tax on bank shares under GS 105-346; and local tangible personal property taxes. Taxes on bank shares levied by counties and municipalities prior to Sept. 1, 1957, are payable, after which such shares are no longer taxable during life of this Article. Real estate of banks remains taxable by local units as other real estate is taxed. Returns are to be filed by June 1 of each year, beginning with June 1, 1958, covering preceding calendar year. Effective for income years beginning Jan. 1, 1957, modifies income tax law by allowing deduction for income tax purposes of dividends from bank stock. If Commissioner of Revenue determines that competing money capital is taxed at lower rate than banks, he is directed to assess and levy ta under this Article against competing person or firm.

Taxation of Building and Loan Associations, Art. 8D, Schedule 1D: Adds new Art. 8D to GS Ch. 105, imposing privilege tax upon building and loan and savings and loan associations of 6¢ for each $100 of capital stock liability, and an excise tax equivalent to 6% of net income as defined in corporate income tax law, less dividends paid or accrued on outstanding capital stock. Amends GS 105-203 and GS 105-212 to substitute reference to this Article for reference to GS 105-73 (13¢ tax on $100 capital stock liability) which is repealed. Taxes are in lieu of all others except those imposed by GS Ch. 54, subch. 1 (filing and recording taxes and fees), taxes on real and tangible personal property, sales and use taxes, and taxes on intangible personal property under GS 105-199 (money on deposit), GS 105-200 (money on hand), GS 105-204 (beneficial interest in foreign trusts), and GS 105-205 (funds on deposit with insurance companies). "To transfer certain sanitation functions from the State Department of Agriculture to the State Board of Health, and to clarify requirements and procedures governing inspection of meat and poultry." [Adds new Art. 24B to GS Ch. 130, authorizing Bd. of Health to adopt regulations governing health and sanitation aspects of handling and treatment of milk and milk products, and transferring from Dept. of Agriculture to Bd. of Health powers and duties contained in GS 106-246, GS 106-247, and GS 106-249 relative to cleanliness and sanitation of milk product plants, cleaning and sterilization of vessels and utensils used therein, and requirement that receiver of product clean container before return, which sections are repealed. Violation of such rules and regulations is misdemeanor punishable by $25 fine for first offense and in discretion of court for subsequent offenses (same as present GS 106-255 penalties). SB 200 - Introduced by Aydlett and others

"Providing for the establishment, maintenance and administration of an unsatisfied claim and judgment fund for the payment of damages for injury to or death of certain persons and for damages to property arising out of the ownership, maintenance or use of motor vehicles in this state in cases involving uninsured negligent motorists." [Creates unsatisfied claim and judgment fund (to be held in trust by State Treasurer) by (1) requiring every person registering uninsured motor vehicle in N. C. for 1958 to pay $8 fee (in addition to any other fee); (2) requiring every automobile liability insurer to pay to State Treasurer by Mar. 31, 1958, 1/2% of its net direct written premiums for 1957; (3) requiring Commissioner of Motor Vehicles to calculate, on Sept. 1, each year, amount needed for fund during coming year, and if he judges the estimated balance at beginning of year to be insufficient, (a) to assess insurers so as to produce sum not exceeding 1/2% of net direct written premiums during preceding calendar year or 10% of estimated deficiency, whichever is smaller (aggregate sum is to be apportioned among insurers according to their premiums for preceding year), and (b) if insurers' assessment is insufficient, to fix an amount as the fund fee for that registration year (which may not exceed $10). Establishes unsatisfied claim and judgment board consisting of Commissioner of Motor Vehicles, Commissioner of Insurance, and five members appointed by Governor, including four representatives of insurers (two to be employees of stock companies and two to be employees of mutual companies) and one representative from public at large; only at-large member is to receive remuneration, and that is to be at rate provided for members of state boards and commissions. Board is to administer the fund and may adopt necessary regulations to perform its functions. Any qualified person (resident of N. C., owner of motor vehicle registered in N. C., or resident of foreign jurisdiction in which an N. C. resident has recourse similar to that provided here), or his personal representative, who suffers bodily or property damage in N. C. arising out of use of motor vehicle on or after Jan. 1, 1958, which may be satisfied from fund, is to give notice to board (as condition precedent to payment from fund) within 60 days after accident (or if disabled, within 60 days after becoming physically capable, or within reasonable time if not physically capable) of intention to make claim for payment from fund, if otherwise uncollectible. Board is to assign to insurers (in proportion to their premiums subject to assessment) for investigation and/or defense all default actions and actions against Commissioner of Motor Vehicles, and any other claims or actions as board thinks advisable which investigations and defenses are to be at insurers' expense (except expenses incurred in appeals which are to be borne by fund). In conducting defense, insurer may take any action deemed appropriate at trial or upon appeal, and defendant is directed to cooperate with insurer. Authorizes any qualified person recovering a judgment (in N. C. on or after Jan. 1, 1958) which exceeds $200 (exclusive of interest and costs) against operator or owner of motor vehicle for injury to person or property arising out of use of motor vehicle (which judgment remains unpaid) to file claim in court which entered judgment, and (upon ten days written notice to board) to apply to court for order directing payment from fund (which may not exceed $5000 personal injury to one person in one accident, $10,000 personal injury to more than one person in one accident, and $2000 property damage in one accident). Applicant is to show (among other things) that he is not spouse, parent, or child of judgment debtor; he was not riding in uninsured motor vehicle owned by him, his spouse, parent, or child; and judgment debtor had no insurance or property which could be levied upon to cover his loss. Court is to order State Treasurer to make payment when it is satisfied that applicant has fulfilled all requirements and exhausted all other remedies. Treasurer is to make payment only after judgment has been assigned to Commissioner. Court may order settlement of action and order payment to plaintiff from fund, after plaintiff has substantially complied with requirements of this act and has alleged judgment against defendant is uncollectible and board has consented to proposed settlement. An insurer (with approval of Commissioner and one other member of board) to whom claim is assigned may settle an action involving payment of less than $2000 when judgment would be uncollectible and act has been substantially complied with. No payment from fund is to be made of (1) claim of less than $200, (2) first $200 of claim or unsatisfied portion, (3) amount over $5000 for personal injury to one person in one accident, (4) amount over $10,000 for personal injury to more than one person in one accident, or (5) amount over $2000 for property damage in one accident. No claim is to be paid which is founded on a default judgment unless board has been given notice and opportunity to take action it deemed advisable; and no collusive or fraudulent judgments are to be paid. Authorizes qualified person receiving damage as result of "hit and run" accident on or after Jan. 1, 1958, to apply to court for permission to sue Commissioner of Motor Vehicles, which is to be granted when court is satisfied applicant is otherwise eligible and has made reasonable effort to ascertain identity of operator and owner of offending vehicle. Commissioner is to have all rights of defendant in defending the action and may settle it (with agreement of board); if judgment is obtained against Commissioner, he is to be subrogated to plaintiff's rights. Provides that person's license or registration which has been suspended or cancelled under financial responsibility act, and payment of judgment against that person has been made from fund, may not be restored until he has repaid the amount paid from fund plus 4% interest per annum and satisfied all requirements of financial responsibility act. Any person knowingly filing with fund, board, or Treasurer any false document is to be subject to maximum punishment of $500 fine, or 30 days imprisonment in discretion of court. Effective Jan. 1, 1958, except as to Commissioner and Treasurer taking necessary preliminary steps to administer the act in 1958 and as to them it is effective upon ratification.] To Insurance.

SB 201 - Introduced by Poyner

"To secure compliance with the highway fuel use tax law by providing a penalty for failure to register." [Effective July 1, 1957, rewrites GS 105-449.52 to establish $25 penalty, payable to Dept. of Revenue, for operating motor vehicle on streets or highways of State (except to park or store vehicle) in violation of GS Ch. 105, Art. 36B (tax on carriers using fuel purchased outside state). All penalties collected go into Highway Fund. Person denying liability may pay under protest and apply to Dept. of Revenue for hearing, which hearing must be held before employee or agent of Department within 30 days of receipt of request. If (after hearing) Department determines that person was not liable, penalty must be refunded. If Department determines that person was liable, he may bring action against Commissioner of Revenue in superior court of Wake County for refund of penalty. No restraining order or injunction may issue from any State court to restrain or enjoin collection of penalty or to permit operation of vehicle without payment of penalty. In addition, Commissioner of Revenue (or his authorized representative) may require $200 bond as presently provided by section.] To Finance.

If in widening street it is necessary to relocate existing curbs, gutters, or drains, cost of such relocation shall be borne by city. Assessment against property owners abutting residential street may not exceed cost of widening an existing pavement of standard construction to 22 feet exclusive of curbs and gutters. Proceeds from sale are to be paid into depository designated by board. Bonds must have approval of Advisory Budget Commission, but consent of no other agency is required. Board shall fix rentals for facilities financed by bonds, so that revenues and other available funds will be sufficient to maintain and operate facilities and pay interest and principal of bonds (only increase in rentals from existing facilities may be applied to payment of bonds), and board may adopt parietal rules to insure maximum use of facilities; board may carry such insurance as it deems desirable. With approval of Advisory Budget Commission, board may secure bonds by trust agreement pledging revenues from new projects and additional rentals from existing facilities, but may not mortgage or convey properties; trust agreement may contain covenants of duties of board and rights of bondholders. [Creates N. C. Real Estate Licensing Board, composed of five members appointed by Governor for 3-year staggered terms. Requires any person, etc., who acts as real estate broker or salesman (or who directly or indirectly engages in business of such broker or salesman) to obtain license from Board (no license is required for person dealing with his own property, for attorney-in-fact acting under duly executed power containing specific authorization for such activity, for attorney-at-law in performance of his duties as attorney, nor for receiver, guardian, executor, trustee, etc., acting under count order, trust agreement, deed or will). Applicant for license must file application with Board, accompanied by fee ($25 for broker, $15 for salesman); and must pass examination to determine his qualifications (including "honesty, truthfulnees, integrity and competency"); persons now licensed are not required to take examination and will receive license from Board upon payment of $10 fee. Licenses expire annually on June 30, and are renewable upon payment of $10 fee preceding expiration. Provides for nonresident licensing by examination and comity, on condition that nonresident file irrevocable consent to be sued within state by service upon "secretary of the commission." Board is to keep register of all applicants, indicating disposition of application, and roster of all licensees (copy of which is to be filed each July with CSC in each county); register of licensees and financial statement is to be filed annually in office of Secretary of State. Board may revoke or suspend licenses for cause (primarily bad faith and dishonesty), after notice and hearing; accused may appeal to superior court of county of alleged violation within 30 days, and receive trial de novo. Any court, hearing suit brought by client against licensee, may (upon judge for plaintiff) revoke license, which may be reissued only upon unanimous vote "of all members of the Board in favor of such reissuance." Board is authorized to make necessary rules and regulations for administration of act. Members of Board receive $15 per day plus $10 subsistence plus travel expense (total per diem for entire Board may not exceed $2500 for any fiscal year); Board may employ secretary-treasurer and necessary clerks and fix their salaries; all expenses must be paid from income under this act; after expenses, Board may place up to 10% of annual income into expense reserve fund, with any remainder to go into State General Fund. SUMMARY OF GOVERNOR HODGES' MESSAGE TO GENERAL ASSEMBLY

Delivered to joint session of the General Assembly
of North Carolina at 12 noon, April 9, 1957

Declaring that there had not been a clear understanding as to his position on schools and teachers' salaries, Governor Hodges denied that he "wanted to unload the State's present burden on to the local school units." He reviewed earlier statements in which he had (1) suggested greater local participation in the financing of schools and (2) proposed creation of a State Citizens Committee for Better Schools to study school needs and their financing. He then asked that the General Assembly create a study commission to look at the problem of school support at all levels and "determine what each county can afford to pay for all its school costs, building, operations, and teachers' salaries." These costs would then be allocated between the state and the 100 counties according to each county's ability to pay.

The Governor then addressed himself to the immediate problem of salaries during the coming biennium. First, he pointed out that the expected surplus at the end of the biennium had been taken into account in preparing the budget recommendations and was not automatically available for salary increases as some had suggested.

Then he suggested that the following funds might be made available for salary increases beyond those originally recommended: (a) $10,000,000 from the capital improvements funds (to be replaced by a $10,000,000 bond issue); (b) $4,289,000 in the General Fund budgeted for support of the independent Prison Department (to be replaced by a like appropriation from the Highway Fund); (c) an expected $1,000,000 resulting from interest on investments, etc., as a result of higher interest rates; (d) $2,811,000 from the proposed revolving fund for capital improvements; (e) $4,400,000 in unexpected surplus resulting from higher revenues than expected; $2,500,000 from Highway Fund for salaries of highway employees.

These funds would provide increases averaging 15% for teachers and 11% for other state employees, in addition to covering retirement costs and leaving $1 3/4 million for other appropriations or contingencies. These increases would be in addition to annual increments and retirement benefits contributed by the state; when these are taken into account, the proposed increases amount to approximately 17% for teachers and 13 1/2% for other employees.

"We are taking a calculated risk by using . . . $34,500,000 [of] non-recurring revenue for current operating expenses during the biennium just ahead, but I am willing to join with you in taking the risk in order to provide these salary raises. I caution you, however, that to go any higher on these and other figures would be very risky and a course of action of which I could not willingly be a part."

The distribution plan recommended by the State Board of Education calls for a lump sum amount to be distributed by the Board in accordance with a schedule which is tied to the status of particular teacher groups and not across the board; it recommended a salary raise averaging 16.1% for teachers (ranging from a high of 17.81% to a low of 9.9%)and 10% for other school employees. We are recommending a sum sufficient for raises of 15% and 11%, but the Board can if it wishes give the other employees 10% and use the surplus to raise teachers still more. "I would also like to recommend that vocational education teachers be given the salary differential which they have had in the past" but that the Board make a survey of their work and the vocational education needs of the state and report to the 1959 Assembly.

"I approve wholeheartedly the pay raise plan recommended by the State Personnel Council for other employees." Under this plan approximately two-thirds of all employees (primarily lower-paid employees) would get more than they would under an across-the-board percentage plan. This plan should be written into law so that each employee may be sure of its automatic application. About 2% of the employees (who are already being paid salaries considerably above their established pay range) would not receive increases. "I recommend that the Appropriations Committee give special consideration" to this group.

The differential in these proposals between the raises for teachers and those for other employees is justified by the fact that during the past four years teachers have received only 1.2% in increment pay increases, while other employees have received 5.6%.

If the proposed increases are enacted, the average teacher salary will be more than $400 per month ($3600 for the 9-months year); in addition, the state provides them retirement benefits amounting to approximately $30 per month (or $270 for the school year). State employees' salaries will compare favorably with those for comparable work in private employment. "We feel sure that you will agree that we have tried to be fair to all state employees and we believe that most employees and the public will so agree."

HB 670 - Introduced by Powe

"To amend the provisions of Chapter 39 of the General Statutes, relating to bulk sales." [Effective July 1, 1957, adds Art. 3A setting forth detailed provisions governing bulk transfers. "Bulk transfers" is defined as any transfer in bulk (not in ordinary course of business) of; (1) 50% or more of value of stock of merchandise or of fixtures and equipment, or (2) so much of stock or equipment or fixtures that remainder is insufficient (together with transferor's other assets) to meet transferor's other debts as they mature. Bulk transfer is not voidable where transferor (1) at or before transfer executes and delivers to named trustee bond equal to value of goods (or fixtures and equipment) for pro rata settlement of transferor's debts, and (2) publishes notice of transfer (within 60 days following transfer) once a week for four consecutive weeks in newspaper in county where enterprise located stating (a) that transfer has been made, (b) name and address of transferor, transferee, trustee, and surety (or sureties), (c) date of transfer, (d) amount of bond, and (e) that any creditor who does not file claim with trustee within six months following transfer is barred from making recovery on bond, and (3) within 30 days after transfer there is filed with register of deeds in county in which enterprise is located a notice of transfer and execution and delivery of bond. Notice is to be filed in deed book and indexed under name of transferor and transferee. Actions for recovery must be filed against transferor, trustee and surety and recovery is to be on a pro rata basis. Action against trustee is barred where creditor has failed to file claim within six months following transfer but other remedies of creditor are not affected. Bulk transfers are voidable as to existing creditors unless specified procedures are followed, and provisions of act apply to transfers by auction sales as well as to other type sales. When bulk transfer is by auction, auctioneer is required to receive and retain list of creditors and inventory of property for 12 months following sale and to give notice of auction personally or by registered or certified mail to all creditors on list at least 15 days prior to auction. Failure to do so does not affect validity of sale but renders auctioneerliable to creditors of transferor as a class for sums owing them from transferor up to but not exceeding net proceeds of auction. Sales in compliance with Article are valid against any objection based on their character as bulk transfers, and transferees and autioneers are not required to see that proceeds of transfer are applied to debts of transferor. When title to property is subject to a defect due to noncompliance with transfer provisions, purchaser of property with notice of non-compliance takes subject to defect but purchaser for value without knowledge takes free of defect. Article limits actions (except actions on bond) to those brought within 12 months following date transferee took possession of goods unless transfer was concealed, in which case actions may be begun within 12 months after its discovery. Failure to give notice to those who became creditors following notice to creditors, and knowingly or wilfully making and delivering incorrect inventory of goods or list of creditors is made a misdemeanor punishable by fine or imprisonment in court's discretion. PUBLIC BILLS INTRODUCED -- HOUSE

HB 925 - Introduced by Wooten

"To provide for the establishment of forest districts." [As title indicates; provides generally as follows:

Art. I. Establishment of Districts. Authorizes 60% of landowners (or owners of 75% of land area) within proposed district to file petition with CSC for creation of forest district, with bond to cover costs of proceeding. CSC is to issue summons to non-signing landowners (may be service by publication and posting in case of unknown owners); on return day he is to appoint civil drainage engineer (on recommendation of State Dept. of Conservation and Development) and two resident freeholders of county (but not of proposed district) as bd. of viewers (whose compensation he is to fix); if petitioners do not do so, he is also to appoint attorney for petitioners. Viewers are to examine land and make (within 30 days) preliminary report as to practicability of proposed district and its boundaries; CSC is to dismiss petition if viewers find it not practicable; otherwise, he is to hold public hearing after notice, at which he may establish boundaries and create district; landowner may appeal from finding. District may condemn rights-of-way for improvements outside district. After creation, CSC is to require viewers to make complete survey, assess damages claimed by any landowner, and classify lands according to benefits to be received (for purpose of assessments); their report is to be subject to advertised public hearing; if CSC finds cost of constructing improvements greater than benefits to be derived, he is to dismiss proceedings; otherwise he is to confirm report; landowners may appeal.

Art. II. Forest Commissioners. After above steps, CSC is to appoint 3-member bd. of forest commissioners, with 3-year staggered terms, to meet monthly and receive pay and allowances fixed by CSC (members not to receive more than $10 per day).

Art. III. Construction of Improvement. Forest commissioners are to appoint competent drainage engineer as supt. of construction, subject to approval of State Bd. of C & D. Detailed procedures for letting of (and payments under) contracts are set forth; contractor is given right to cross private lands and remove timber (which he may retain) in course of work. Detailed procedures for crossing public or private ways and railroads (by drainage systems) are set forth. Commissioners are charged with maintenance of improvements, and may levy assessments therefor; negligence of landowner causing damage to improvements is to result in his paying for repairs; it is made misdemeanor (punishable by fine in amount not exceeding twice the damage done) for any person to damage improvements constructed under act.

Art. IV. Assessments and Bond Issue. Forest commissioners are to estimate cost of drainage, tree-planting, and other improvements for three years and certify results to CSC; if total cost is less than average of 25¢ per acre, all lands are to be assessed in accordance with their classification; if it is more, commissioners are to give notice of proposed bond issue; any landowner not wishing to pay interest on bonds may make immediate payment of his share of cost. Sets forth detailed procedures for issuance and payment of bonds, and assessments to be collected for their payment; assessments are to constitute first and paramount lien (second only to State and county taxes) on lands assessed; sheriff or tax collector is to collect.

Art. V. Subdistricts. Authorizes landowners to form subdistricts within forest districts, by same procedures as for formation of districts; subdistrict commissioners may control all matters pertaining to forestation within their subdistricts "except such work as belongs exclusively to the main district".

Art. VI. Bonds for Improvement and Maintenance. Authorizes forest commissioners to issue bonds for improvement and maintenance whenever it would be unreasonable burden on any landowner to pay assessment in one payment; commissioners must petition CSC, who must appoint viewers to report concerning proposed issue; unfavorably report is to cause disallowance; upon favorable report, CSC is to order viewers to prepare new

survey, plus report of lands benefited, costs of improvements, etc.; landowner may appeal. No forest assessments for original object may be levied on property when once paid in full. Bond procedures for maintenance bonds are same as for construction bonds.
Art. VII. Adjustment of Delinquent Assessments. Sets forth detailed procedures for such adjustment.
Art. VIII. Report of Officers. Requires forest commissioners to file with CSC monthly financial report during construction; after construction, they must file annual report; failure to report is misdemeanor punishable in discretion of court.
Art. IX. General Provisions. Requires liberal construction of provisions of act. Defects in proceedings prior to final confirmation are not to defeat collection of assessment. Appeals are to affect only person appealing. Surplus funds may be invested in United States bonds or in securities which are authorized investments for fiduciaries under GS Ch. 36, Art. 1. Court may remove officers of district upon petition for cause. Person (a) violating provisions of law as to forest districts, (b) leaving log, brush, or trash where it is liable to wash into adjacent stream and obstruct flow, (c) cutting tree so as to fall in a stream, (d) placing any other obstruction in a stream or road in a forest district, or (e) setting fire to or destroying (without owner's consent) trees in a forest district, is to be fined not less than $100 or imprisoned not more than 60 days.] To Judiciary 2.

HB 978 - Introduced by White
"Creating a Personal Loan Authority and providing for the administration, cost and maintenance thereof and regulating the making of loans in amounts of $300 or less; limiting and restricting the amounts of interest, fees, insurance and charges made in connection therewith and prescribing penalties, punishment and injunctive relief for the violation of the provisions of this act." [Prohibits any unlicensed person (including partnerships, corporations, etc.) from engaging in business of lending money in amounts of $300 or less (measured by net amount of cash advanced to borrower), and from charging in connection with a loan interest, expenses, or other charges which in the aggregate exceed the legal rate of interest. Contract of loan made or collected in violation of prohibition is void; lender has no right to recover or retain principal, interest, or charges, and is guilty of misdemeanor (punishable by maximum fine of $500, imprisonment for six months, or both). Act does not apply to person doing business under State or U.S. law relating to banks, trust companies, savings and loan and building and loan associations, industrial banks, savings banks, credit unions, licensed pawnbrokers, Morris Plan companies, loan agencies or brokers defined in GS 105-88 (privilege license: loan agencies and

brokers) engaged principally in making or arranging loans in excess of $300, nor to persons engaged solely in making loans of $50 or more secured by motor vehicles.

Creates Personal Loan Authority consisting of State Treasurer (chairman) and two members appointed for 2-year staggered terms by Governor (one member representing public, and one member representing and being actively engaged in loan business): members receive same per diem and expenses as do members of Advisory Budget Commission. Authority may designate necessary personnel, (including a Personal Loan Commissioner as its chief administrative officer, to serve at its pleasure at a salary fixed by Advisory Budget Commission). Authority is to be self-supporting from investigation and license fees fixed by act. Commissioner may employ sufficient clerical help (who shall be paid as other employees in State departments,and be subject to same rules and regulations). Authority may, after public hearing, adopt regulations necessary to interpret, implement, or clarify act; notice of hearing must be mailed to each licensee under act at least 20 days prior to hearing; copy of each regulation must be mailed to each licensee at least 30 days prior to effective date. Authority must comply with applicable provisions of Art. 18, GS Ch. 143 (Rules and Regulations Filed with Secretary of State).

Applications for license must be accompanied by investigation fee of $50 and annual license fee of $100 (for year ending June 30); if license is issued after Dec. 31 of license year (after first year) fee is $50; fee for 1957-58 is to be paid by Aug. 1, 1957. License is to be granted if, after investigation, Authority finds following facts: (1) character, etc., of applicant is such as to warrant belief he will operate lawfully; (2) applicant has (available for operation) liquid assets of at least $15,000; and (3) that there is reason to believe applicant will pay fees required in GS 105-88 (privilege license: loan agencies and brokers). If application is rejected, applicant may request hearing within 30 days, and hearing must be held within 60 days of request, unless applicant agrees otherwise in writing; if application is denied after hearing, order shall be accompanied by findings of fact, and license fee shall be returned to applicant. Authority must act on application within 45 days from filing, and if license is granted, licensee must commence business within 90 days thereafter, or license becomes void. Persons who have paid privilege license tax and complied with present Small Loans Act prior to ratification of this act are to be granted licenses upon application, but they must maintain other requirements during life of license. Licenses are not assignable; licensee may move his business from one location to another upon 15 days' notice to Authority; a separate license is required for each office operated under act.

Licensees are authorized to land $300 or less and make following charges: (1) same interest lawful for industrial banks; and (2) same investigating and loan-making fee on each $50 or fraction thereof as may be charged by industrial banks ($2.50 for first $50; $1.50 for each additional $50, up to $250); and (3) installment handling charge of 30¢ per week from date of loan to maturity. In event of prepayment of loan, lender must refund unearned interest which amounts to more than $1.00 and a proportionate amount of handling charge, and shall not charge same borrower investigation and loan making fee on any loan made within 60 days of previous loan, except with respect to amount in excess of previous loan.

Licensee may not set up two loans for purpose of effecting higher charges than otherwise permitted. Loan contracts may not exceed 15 months, and weekly installments may not be less than $1.50 (semi-monthly: $3.00; monthly: $6.00), exclusive of handling charge. Charges are exclusive, except for acknowledgment fees, repossession and execution expenses, recording fees, and credit life insurance premiums (which may not be required for loans of $50 or less). If improper charges are made, licensee loses rights to receive interest, fees, or other recompense, and is guilty of misdemeanor. Sets out detailed requirements for making and paying of loans; forbids taking of chattel mortgage (or other lien) on household furniture unless in writing.

Authority may investigate any person whom it has reason to believe is violating act, and must investigate each licensee at least once per year; licensee is to pay cost of investigation (not to exceed $50 per day for 3 days,unless conduct of licensee indicates additional examination is necessary).

Upon reasonable cause, Commissioner may issue order requiring person to desist from action believed to violate act, and may bring action on relation of State to enjoin such violation; court has jurisdiction to impound (and appoint receiver for) property and business of defendant, including books and records. Licensees must keep adequate records and preserve them for at least two years. False advertising relating to loans is prohibited. Other business may be conducted from same office, unless Authority (after notice and hearing) finds other business conceals violations of act and orders its discontinuance. Licensees must file with Authority annual report by March 1, summarizing transactions and profits.

Authority may, after 10 days' notice and hearing, revoke or suspend license for knowing violation of act or regulations; suspensions may not extend beyond 30 days; action of Authority is reviewable as provided in Art. 33, GS Ch. 143 (Judicial Review of Certain Administrative Agencies). All laws relating to loans of $300 or less (unless exempted by act) are repealed. Persons making loans under this act and under other loan laws must be licensed under both or all. Effective July 1, 1957.] To Judiciary 1.

BULLETIN NO. 65
Tuesday, May 7, 1957

Session: Senate -- 12 noon

PUBLIC BILLS INTRODUCED -- SENATE

SB 389 - Introduced by Martin and Hamilton

"To call a convention of the people of North Carolina to provide for the nomination and election of delegates and for the submission of the proposals of the convention to the people for adoption or rejection." [Provides for vote at Nov., 1958, general election on question of calling State Constitutional Convention, and for election of delegates to convention, if convention approved by majority of those voting. Establishes procedures for holding elections. Convention is to consist of 100 delegates (one from each county), nominated by petition signed by 300 voters of county and by the candidate being nominated, and filed with county elections board. Party nominations for delegates shall not be made, but party designation of one candidate per party may appear on nominating petition and ballot (with permission of party's county executive committee). Waives "laws" prohibiting double office holding (but apparently not Art. XIV, Sec. 7, of State Constitution) as to convention delegates. Vacancies in delegations must be filled in same manner as vacancies in General Assembly (successor nominated by county executive committee of party to which member vacating seat belonged, and appointed by Governor). Candidate receiving highest number of votes in any county wins. If voters approve convention, convention shall meet first Monday in July, 1959, and complete work by Sept. 1, 1959. It may propose entire revision of constitution, or amendments thereto (together with explanatory material and propositions to appear on ballot), and make rules for its own government. Constitutional revision or amendments proposed by convention are to be voted on in general election in 1960. If revised constitution is submitted and approved by majority of those voting, it goes into effect according to its terms. If separate amendments are proposed, those approved go into effect according to their terms.] To Judiciary 2.

SB 394 - Introduced by Hamilton

"Relating to mosquito control in North Carolina." [Directs State Board of Health to maintain appropriate mosquito control units and to employ qualified personnel (employees of Salt Marsh Mosquito Study Commission who have satisfactorily performed their duties for year or more are to be deemed qualified) to promote healthful environment and control swarming mosquito menace. All property of Commission is to be transferred to Board upon effective date of act. Authorizes Board to engage in research, develop programs, and do other necessary things to carry out purposes of act. Board is authorized to accept and expend any grants-in-aid made available by federal government for mosquito control purposes, and all funds received by Board may be used to aid local governmental units engaged in such purposes (State grants to local units must not exceed funds or value of local facilities provided for temporary control measures, or twice local funds or facilities for improvements such as drainage). State aid to local units is not to be given until Board has proof that required local funds are available and will be used according to plan approved by Board. State Health Officer may use appropriated funds in emergencies where proved outbreaks of mosquito borne diseases occur. Effective July 1, 1957.] To Public Health.

Upon petition of 10% of resident freeholders within proposed district, county commissioners of county in which major portion of petitioners are located must request that a representative of State Board of Health hold joint public hearing with county commissioners concerning creation of district. Posted and published notice of hearing must be given in each county affected for four successive weeks. If, after hearing, Board of Health and county commissioners feel that district should be created, commissioners are to submit question to voters of district at special election; prior to election, Board of Health and county commissioners may make minor deviations in the boundaries described in petition, provided that 10% of resident freeholders within revised boundaries have signed original petition. Expenses of election are to be prorated among counties according to number of county residents within the district. If election favors creation of district, county commissioners shall adopt resolution declaring that it exists. Boundaries of existing district may be extended to include contiguous territory upon petition signed by 51% of resident freeholders within area to be annexed, approved by governing board of district, Board of Health, and county commissioners of counties in which district and annexed territory lie. Districts are to be governed by 5-member board, composed of district residents. State Health Officer and Director of Wildlife Resources shall each appoint one member to serve at pleasure of appointing authority. If district is wholly within one county, county commissioners shall appoint three members to serve 3-year staggered terms; if district lies in more than one county, three members of district board shall be appointed at joint meeting of county commissioners for 3-year staggered terms; members shall be selected from counties according to pro-rata portion of total residents of district residing in each county, and shall be named by commissioners of county in which they reside; if this method results in any county not being represented on board, additional member may be appointed by commissioners of each such county. Vacancies are to be filled by authority making original appointment. Board is to elect its own officers, and is to receive no compensation except actual travel expense. District commissioners constitute a corporate body, with following powers: (1) to sue and be sued; (2) to levy tax not to exceed ".35 per $100 of taxable property." (3) to accept gifts, endowments, and federal and State grants-in-aid; (4) to take steps to prevent mosquito breeding and to destroy mosquitoes and other arthropods of public health significance; (5) to conduct arthropod control measures in cooperation with other individuals and agencies; (6) to enter all places within district (whether privately owned or not) to treat breeding places and do necessary things to carry out powers; (7) to acquire, hold, and dispose of real and personal property necessary or convenient to purposes of act (condemnation proceedings must be in accordance with GS Ch. 40); (8) to employ necessary personnel, fix salaries, make contracts; (9) to borrow money in amounts not to exceed anticipated tax receipts for one year; (10) to reimburse members and employees for actual travel expense; (11) to employ a specialist as district superintendent (subject to approval of State Health Officer). Proposed plan of operation must be submitted by district to State Health Officer 60 days prior to initiation of operations, and must be approved by him before any action is taken; annually plan for next year must be submitted 60 days before end of fiscal year, and must be approved before program of new year begins. District board may by resolution (reciting specified information) authorize issuance of negotiable bonds of district; actions to contest validity must be commenced within 30 days after first publication of resolution. After adoption of bond resolution, county commissioners of counties affected shall hold election in district on question of issuing bonds; if result is against bonds, new election may be held after six months; costs of elections are to be paid by district; new registration of district voters must be held (after 30 days' notice) following creation of district; results of elections shall be filed with CSC in each county affected. Duly authorized bonds may not be sold at less than par nor bear interest in excess of 6% per annum (detailed requirements as to bonds are set forth). Proceeds from sale of bonds are to be deposited in N.C. bank (with proper security).] To Judiciary 2.

HB 1051 - Introduced by Wooten

"Rewriting all of Article 36, Subchapter VI, Chapter 160 of the General Statutes entitled 'Extension of Corporate Limits'." [Authorizes governing board of any municipality by ordinance (upon such conditions as board deems reasonable) to define the corporate boundaries of the municipality, which may include territory not previously annexed (annexation is to be binding unless territory is within limits of another municipality), or to annex contiguous territory. After passage of ordinance, it is to be published for two consecutive weeks in daily newspaper of general circulation in municipality (or in county if none published in municipality). Authorizes mayor and "proper administrative board," with approval of governing board, to contract (for period not exceeding 15 continuous years) with contiguous property owners (in lieu of annexation) for payment of money to municipality (for municipal services received, to be received, in lieu of taxes if annexation occurred, or wholly unrelated reason); during effective term of contract the property of contracting owners may not be annexed by contracting municipality. Empowers 51% of property owners adjacent to municipality to file petition with governing board of municipality requesting special ordinance annexing territory described in petition. If ordinance is not passed within 60 days after filing of petition, petitioners may file duplicate in superior court (or with judge in chambers) stating why annexation should take place. Notice of proceedings is to be served on officers of municipality, and court (or judge) is to decide question of annexation (without jury) considering as primary determinants (1) annexation is in best interests of municipality and petitioning territory, (2) area is urban in character and economically and socially part of municipality, (3) terms of ordinance are fair, (4) municipality is financially able to service area in near future, (5) area, if undeveloped, is needed for municipal development in near future, and (6) lines of annexation form compact area abutting municipality. Authorizes majority of landowners or owners of 75% of assessed value of land annexed by either method described above to file their complaint against annexation in superior court (or with judge in chambers) within 30 days after last publication of notice in newspaper. After court has determined complaint is properly filed, hearing must be set not later than 60 days thereafter, and municipality must be served with notice of proceedings. Court is to decide question of annexation upon same considerations set out above. Annexation is not to be effective during time appeal is pending or time in which appeal may be taken. If decision is against annexation, municipality may not take further proceedings for annexation for two years. Provides that if annexation of a municipality located within another municipality is not accomplished as act contemplates, minor municipality is not to be entitled to receive municipal services from major municipality until corporations have entered into contract calling forreasonable compensation for such services. Sets out procedures for court adjudication of contract terms if agreement cannot be reached between parties. Prohibits annexation of part but not all of another municipality, under these provisions. Provides that municipality annexing another municipality having outstanding bonds indebtedness is to be liable for that indebtedness existing at time of annexation; apparently municipality annexing part of another municipality (under other laws) will be liable for all of other municipality's indebtedness. Directs governing board of municipality to order inclusion within limits of tier of "outlots" adjoining the municipality upon petition of 2/3 of owners asking inclusion. Authorizes governing board, by resolution, to extend boundary of municipality to include adjoining lots platted and recorded in office of register of deeds. Governing boards of municipalities are directed to record in registers' offices a map of boundaries and annexations to the municipalities.] To Judiciary 2.

HB 1053 - Introduced by Long
"To amend Section 6-5 of the General Statutes so as to eliminate inclusion of the jury tax in costs in criminal courts not having juries." [As title indicates; present jury tax of $4.00 applies to all criminal proceedings.] To Judiciary 1.

"Amending Article 6 of Chapter 130 of the General Statutes to authorize any sanitary district upon entering into a contract with a city or town to which all of such district shall be annexed to transfer and convey to a non-profit and non-stock corporation, organized under Chapter 55 or other applicable chapters of the General Statutes of North Carolina for recreational purposes, and providing for the continuance in office of members of a sanitary district board and defining the duties of such board when the area included within the limits of a sanitary district are annexed to an incorporated city or town." [Adds GS 130-57.10 to provide that when all of area within sanitary district is annexed to a town, the governing board of the district may, pursuant to terms of written contract between district and annexing town (and prior to effective date of annexation) transfer all or part of its property, on such terms as it may determine, to a non-profit corporation to be used for recreational facilities. District may sell property and after paying debts and expenses, give the balance of purchase money to such corporation. Annexing town may purchase district property at private sale, without advertisement, regardless of amount involved. Upon transfer to non-profit corporation, property is withdrawn from public use and is abandoned for public purpose. Adds GS 130-57.1(a) to provide that if annexed district has debts which annexing town contracts to pay, district continues to exist for enforcement of contract with town and preservation of rights of creditors. Vacancies in district board during such period are to be filled by appointments made by county commissioners. When debts are paid, district board has no further power.] To Judiciary 2.

HB 1032 - (Durham) Introduced by Powe and Hill

"Providing for the extension of the corporate limits of the City of Durham." [Act declares that described areas outside corporate limits of Durham should become part of city and that question of extending corporate boundaries should not be a political question to be determined by an election, and authorizes city council to adopt resolution stating intent to annex all or part of described area. Resolution (to be published for four weeks in paper having general circulation in county) is to describe area to be annexed, call a public hearing (within 30 days), and state effective date of annexation. After public hearing council is authorized to adopt annexation ordinance to be effective on Dec. 31, following date of adoption of ordinance. Following effective date of ordinance, territory annexed, and its citizens, are to be subject to all debts, laws, ordinances and regulations of city, and newly annexed property is to be subject to municipal taxes for fiscal year following date of annexation. Upon annexation, mayor is required to have accurate map of annexed area to be prepared and (with copy of annexation ordinance) recorded in offices of register of deeds and Secretary of State. No part of described area may be annexed, however, until city council (and administration) has made a detailed study of services that must be provided in area, the cost of providing such services, revenues available, and time within which services can be provided, and has made affirmative finding that city will be able to (and will) furnish on and after effective date of annexation, the same general municipal privileges, benefits, services, and facilities to territory to be annexed as are provided in other comparable parts of city. Preliminary to such finding, council must be satisfied that area to be annexed can be included in jurisdiction of (1) one or more of regularly constituted police motor and/or foot patrols, (2) one or more of regularly constituted fire companies, and (3) garbage collection plan of city, and that city is prepared to take over street maintenance. In addition, plans must be shown for installation of street lighting and installation of water and sewer mains (with plan of financing and with certificate that extension plan will provide water supply of quality and at a pressure equal to minimum quality and pressure in similar areas of city). Act is effective July 1, 1957, but council may not annex any territory pursuant to act after Jan. 1, 1959, unless resolution has been adopted previously and annexation has been delayed by court action.] To Local Government.

"To provide for the regulation, taxation, control, and licensing of racing within the State of North Carolina; to create and establish a State Racing Commission, prescribe its duties and authority; to fix the terms of office, compensation and manner of appointment of its members; to provide for county-wide referenda; to allocate revenues among the various counties of this state, and otherwise; to establish a procedure for the issuance of licenses to conduct racing operations; to regulate pari-mutuel pools conducted in connection with racing operations; to declare the purpose and intent of this act; to repeal conflicting laws; to establish the effective date; and for other purposes." [Establishes North Carolina State Racing Commission composed of three members to be appointed by Governor (who designates chairman) for staggered 4-year terms; in order to be eligible for appointment to Commission, persons must have resided in state for five years, and may not (a) have any official relation to (or be stockholder in) any association or corporation conducting racing in state, (b) be engaged in racing in state (or elsewhere), nor (c) have any financial interest in horse or dog racing. Commission may employ necessary personnel and fix their compensation (and may require them to be bonded in amount of $10,000), and may employ treasurer (who must be bonded in amount of $25,000). Commission is to have principal office in Raleigh. Chairman's salary is fixed at $7500, and members' at $1200 per year (plus travel expenses), payable solely from moneys paid for racing licenses. Commission is authorized to (1) make and enforce reasonable rules for protection of racing patrons, and for the conduct of licensed racing operations; (2) after hearing, revoke and suspend licenses (subject to court appeal); (3) require licensees to furnish necessary information (including data on employees); (4) conduct hearings, investigations, and audits for enforcement of act; (5) receive, hold, disburse, or transfer funds or property (in accordance with act).

Provides for calling (upon petition of 15% of qualified voters of county) of special election to determine whether racing (and parimutuel betting) may be established in county, and permits vote after one year (upon petition of 15% of voters) upon abolishing racing. If majority of voters favor establishing racing in county, application may be made to county commissioners for license to conduct racing operations. Before granting license, commissioners are required to investigate applicant; if satisfied that applicant meets necessary standards of moral character and honesty, they must issue license permitting applicant to conduct either horse racing, or dog racing, or both (plus recognized parimutuel betting systems). Licenses are unassignable and are void unless licensee commences operations thereunder within one year. Hearing and court appeal are provided for applicant denied license.

Makes it lawful for persons over 21 to bet or operate licensed parimutuel machines; licensees may retain 15% of horse-racing bets and 17% of dog-racing bets, with remainder to be disbursed among bettors. Persons connected with track must pay State occupational license tax.

Licensees are required to pay to Racing Commission 20% each of (1) amounts retained by licensee from parimutuel operations; (2) net receipts from concessions on premises; and (3) net receipts for admissions; payments are in addition to any other State or federal taxes. Settlement is to be made at seven-day intervals during racing season, and must be accompanied by a financial report (under oath). Commission is required to make an accounting and pay into Department of Revenue on first day of each month balance on hand in excess of necessary reserve (to meet expenses and obligations of Commission) and must make final annual report and settlement by Jan.16 of ensuing year. 50% of funds paid into Revenue Dept. is to go into state General Fund, and other 50% is to be allocated to counties in which racing is conducted, in exact proportion to gross receipts received by Commission for racing operations in each county. Act is to be liberally construed, and all laws in conflict therewith are repealed.] To Judiciary 2.

PUBLIC BILLS

SB 7 - Revenue bill. Reported favorably as to committee substitute; committee substitute adopted which makes following changes: [Note: This digest is of working copy of bill; copy submitted to Senate was not available, but it is believed that digest is accurate.]
Inheritance Tax: Rewrites GS 105-14 to change method of determining tax credit which beneficiary of estate under GS 105-4 or 105-5 may claim by reason of inheritance taxes paid on prior transfer within two years of death of decedent under whom beneficiary takes; credit is to be determined by taking that proportion of total tax paid by prior transferee which the property previously taxed and transmitted to present beneficiary bears to total property received by prior transferee. Repeals GS 105-32 (under which N.C. seeks to insure that non-resident's estate administered in N.C. pays proper taxes to domiciliary state of decedent, if that state cooperates similarly with N.C.).
License Tax: The new "gross receipts" approach of the original bill is abandoned, and existing statutes are amended as follows: Amends GS 105-74 to add 1% gross receipts tax on dry cleaning, pressing, and hat blocking, to be collected by taxpayer from customer (sales to governmental, charitable, and non-profit agencies, and sales subject to 3% retail tax are exempt). Effective June 1, 1957, amends GS 105-72 to exempt from section person selling lubricating oil or grease; amends GS 105-82 to include TV and auto radio sets and their parts, and to include servicing of all instruments; amends GS 105-102.1 to include within tax limitations of section the activities of cooperatives directly related to marketing (and amends GS 105-125 to conform); repeals GS 105-73 (which imposes tax of 13¢ per $100 book value on bldg. & loan associations); amends GS 105-83 to fix tax on installment paper dealers at .0026 (now .00333) of face value of paper handled.

Franchise Tax: Adds exception to GS 105-122(3)(A) to provide that if 100% of corporate property and payroll is in N.C., then all of capital structure shall be attributable to N.C. for franchise purposes unless net income of corporation is taxed by another state, or would be taxed if another state had same income tax laws as N.C.

[Amends GS 20-88 (c) as title indicates; applies to tax years beginning on and after Jan. 1, 1957, and Dept. of Motor Vehicles is authorized to refund (on demand) amounts paid in excess of those levied by act.] To Finance.

HB 1346 - Introduced by Griggs
"For the better protection of migratory wild fowl in Currituck Sound and its tributaries, to enable the County of Currituck to cooperate with the North Carolina Wildlife Resources Commission." [Places hunting, shooting, killing, or trapping of wild fowl (consisting of geese, ducks, brant, or other wild fowl) from shore, marsh, blind, or other floating device on or adjacent to Currituck Sound or its tributaries within Currituck County (including that part of North River within county) under regulations of Wildlife Resources Commission (which is to provide at least one full-time warden and four deputies) and of Currituck County game commission. Licenses for taking migratory wild fowl in described area are to conform to regular license, and to be sold by Wildlife Commission (with proceeds to go to State). Licenses for blinds are to be sold by CSC of county (with all proceeds to Wildlife Commission, except that county game commission is to retain $6 of fee for point blind, $7 for bush blind, and $7 for float blind). Creates 5-member Currituck game commission (with CSC as ex officio secretary), to be selected by county commissioners with approval of Wildlife Commission. Members are to be appointed on first Monday in June, 1957, and biennially thereafter. Commission is to have control over licensing of blinds and is to have concurrent jurisdiction with Wildlife Commission in enforcing migratory wild fowl laws. Requires license (restricted to N.C. residents)

to own or operate blind, and floating blinds are to be restricted to professional guides known to county game commission or satisfactorily vouched for as boatmen of ability, character, and sobriety. Sets forth detailed provisions for application for, and issuance of, licenses (with provisions for appeal upon refusal) and regulations for hunting (including allowable hours). License applications must be approved by both Wildlife Commission and county game commission; license fee for float blind is fixed at $8 plus 25¢ fee for clerk; for point blind, $15 plus $1 fee for clerk. Compensation of chairman of county game commission is fixed at $500 per year plus $5 per diem and 7¢ per mile travel allowance, and of members at $250 plus same per diem and travel allowance; extra compensation of CSC as ex officio secretary of county game commission is fixed at $500 per year. Act does not prohibit owner of land (or his guests) from hunting at unlicensed temporary blinds on owner's property if location is not within 500 yards of licensed blind being used, so long as other requirements as to hunting migratory wild fowl are met. Makes presence in floating device or on shore with contrivance used in hunting prima facie evidence that one is there for purpose of hunting. Makes it unlawful (a) for guide or other person to accompany unlicensed hunter; (b) to shoot waterfowl without stand of artificial decoys; (c) to use licensed bush blind for hunting without written permission of licensee. Hunter may shoot cripples within 250 yards while lawfully hunting. County game commission (with approval of Wildlife Resources Commission) may revoke (after hearing) license of violator; violation is also misdemeanor punishable by maximum of $50 fine or 30 days' imprisonment (each violation is separate offense).] To Wildlife Resources.
